PROFESSIONAL SUMMARY

BS Computer Science & Mathematics (Purdue Fort Wayne, May 2026). Incoming MS Bioinformatics student at University of Illinois Urbana-Champaign (Aug 2026) with a CS concentration. Hands-on experience in full-stack development, AI integration, and microservices architecture. Proficient in Python, JavaScript, TypeScript, and cloud deployment with AWS, Docker, and Kubernetes. Passionate about building scalable AI-driven solutions and optimizing system performance.

EDUCATION

Purdue University Fort Wayne

Bachelor of Science, *Computer Science and Mathematics*

Aug 2022 - May 2026

GPA: 3.78/4.0

University of Illinois Urbana-Champaign

Master of Science, *Bioinformatics (CS concentration)*

Aug 2026 - May 2028

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C

Frameworks & Libraries: React, Node.js, Express, Next.js, Spring Boot, LangChain

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS, Docker, Kubernetes

Tools & Software: Git, GitHub, CI/CD pipelines, OpenCV, Ollama LLM, n8n

Soft Skills: Agile/Scrum, REST API design, microservices, security fundamentals

WORK EXPERIENCE

Purdue University | CS Student Scholar Mentor

Jan 2024 -

- Mentored 20+ Computer Science students in problem-solving, integrating calculus and discrete math concepts to strengthen analytical skills.
- Developed personalized study strategies and time management techniques that improved student performance and academic confidence.

360DMMC | Software Engineer & AI Automation Intern

Oct 2025 - Dec 2025

- Designed and developed AI-driven SaaS applications by integrating automated workflows with n8n, reducing manual processing time by 40% and improving data accuracy across multiple services.
- Implemented workflow orchestration that linked REST APIs, AI models and Docker-hosted cloud services using JavaScript, which improved processing efficiency, cut manual effort, and delivered a smoother real time experience

Purdue University | Software Developer

May 2025 - Aug 2025

- Designed and implemented a microservice architecture with Node.js/Express, TypeScript, and PostgreSQL, adding an AI-driven summarization feature that improved system throughput by 35% and reduced API response times by 25%.
- Built interactive dashboards with Next.js and JavaScript enabling real-time monitoring of 50+ key metrics, improving admin oversight and enabling data-driven decision-making.

Purdue University | Undergraduate Research Assistant

Jul 2024 - May 2025

- Conducted research on data visualization effectiveness, analyzing how graph selection impacts interpretation across 200+ datasets focusing on category and discrete relationships.
- Identified and documented 12+ visualization anti-patterns and developed actionable guidelines to reduce misinterpretation risk for analysts and decision-makers.
- Presented findings at Purdue Fort Wayne Research Symposium, demonstrating impact of visualization design on data comprehension.

Purdue University | Undergraduate Teaching Assistant

May 2024 - May 2025

- Assist in managing administrative tasks and supporting students in the year-long Senior Capstone course.
- Collaborate in designing a structured syllabus and creating Python-based assignments for the Intro to Data Analytics course.

PROJECTS

NestWise- Agentic AI Retirement guide |

Aug 2025 -

- Ongoing Senior Capstone: Developing an AI-driven retirement planning application leveraging agentic LangChain, Retrieval-Augmented Generation (RAG), and large language models (LLMs) to provide personalized retirement planning insights.

AI-Based Scholar Chat Feedback Platform |

Jan 2025 - Apr 2025

- Designed and developed a digital feedback system to replace the department's low-participation QR-code survey, improving feedback reliability and mentoring visibility.
- Built using MERN stack, integrated Ollama LLM for AI-powered mentor note summarization, and deployed on AWS with Docker & Kubernetes for scalability.

Project Prometheus – Exam grader |

Sep 2024 - Dec 2024

- An AI-powered system leveraging a custom Convolutional Neural Network (CNN) and OpenCV for automating the grading of handwritten MCQs and Fill-in-the-Blank exams, achieving 95% standalone accuracy.
- Integrated OpenAI as a backup solution to handle ambiguous cases, with the system predominantly relying on the CNN model for accurate grading.

Research on effective data visualization techniques |

Jul 2024 - May 2025

- Conducted research on how graph selection impacts data interpretation, focusing on Category vs. Discrete and Category vs. Category relationships.
- Analyzed risks of misleading visualizations and proposed guidelines to help researchers, analysts, and decision-makers select effective visualization methods.
- Presented findings at the Purdue Fort Wayne Research Symposium.
